

Peneapple Peeler PAP-001

Pelamatic industrial pineapple peelers provide fast and efficient peeling. Its design allows the pineapple to be peeled once the crown has been removed, and the fruit is extracted allowing it to be perfectly chopped and ready for packaging, keeping all its flavors and juices.

The electro-pneumatic pineapple peeler comes with a special reinforcement to facilitate peeling of the skin, avoiding pineapple eyes and making the most of the fruit. It also keeps the rind of the skin intact, this makes these machines essential for fruit production processes.

General characteristics

- Resistant, fast and effective.
- Better use of the fruit.
- Electro-pneumatic machine.
- Allows quick and safe cleaning using warm water and a cloth. Recommended daily cleaning.
- Inclined metal tray to perfectly collect the chopped fruit.
- Self-adjusting polyethylene pieces for a better hold of the fruit.
- Allows you to choose the size of the sliced.
- Designed with a metal structure on locking wheels that allows easy movement of the machine.
- Finished in food grade stainless steel and polyethylene.
- Recomendado to accompany with the Pelamatic pineapple and slicer.

Technical characteristics

Productivity	2/3 units/min	Net weight	70 kg
Dimensions	70 x 80 x 180 cm	Consumption	440W
Voltage	220/240 V - 50/60 Hz	Air pressure	6 kg
Fruit size	Size 9	Slice thickness	15 mm aprox.
Cut diameter	74 mm aprox.	Chopping	8 triangles per slice
Core diameter	3 cm aprox.	Material	304 stainless steel and polyethylene
