Robito Vaina Baby
RVB-001

Robito Vaina Baby is a variant of the Robito Vaina sheller. With this model you can extract all small legumes effortlessly.

Also, due to the small size of the legume, you will be able to shell more units per minute. Ideal for baby beans or peas, among others.

Double Robito Vaina
RVD-001

Robito Vaina Doble is the fastest variant of the Robito Vaina sheller. By having two pod inlets you will be able to do double the work in half the time.

Ideal for all types of beans, depending on the grain of the legume. It is pre-configured for small, large or mixed (one input for large and one for small).

Technical characteristics

Productivity	30 pieces/min aprox.
Dimensions	15 x 20 x 11 cm
Net weight	1.1 Kg
Voltage	220/240 V - 50/60 Hz 110/120 V - 50/60 Hz
Consumption	0.08 A
Material	ABS plastic
Blades	4 blades
Blade durability	1.000.000 cuts aprox.

Productivity	50 pieces/min aprox.
Dimensions	25 x 22 x 11 cm
Net weight	2 Kg
Voltage	220/240 V - 50/60 Hz 110/120 V - 50/60 Hz
Consumption	0.16 A
Material	ABS plastic
Blades	Personalized
Blade durability	1.000.000 cuts aprox.
